EXPERTISE

- Figma (SOFTWARE)
- Mobile Apps
- Website
- Wireframing
- Prototyping
- Testing
- Research

LANGUAGE

- English
- Urdu

PROFILE

I see design as more than visuals — it's about building products that feel clear, simple, and meaningful. As a Product Designer with 2 years of experience, I turn ideas into smooth, user-friendly experiences that solve real problems. I think beyond screens by understanding users, refining flows, and making sure every detail has a purpose, while continuously improving my skills to create better digital products.

WORK EXPERIENCE

Associate UI/UX Designer – Alpha Hive AI

2025 - Present

(Remote)

Worked on designing and improving user interfaces for web and mobile products, focusing on making them simple and easy to use. Collaborated with developers to implement designs and fix usability issues during the process. Created wireframes and prototypes, and made small improvements based on feedback to enhance the overall user experience.

UI/UX Design Intern – CosmiCode

Jun 2025 - Aug 2025

(Remote)

Assisted in designing basic UI screens and improving existing layouts for better usability. Worked with the team to understand project requirements and contributed to simple wireframes and design updates. Learned practical design workflow, collaboration, and how to turn ideas into functional screens.
